

Deboz Building Design Solutions

DeBoz - Building Design Solutions was formed in September of 2000 with the aim of providing quality services to those who are building, renovating or extending, as well as who are in some way involved in the building industry. The initiative behind DeBoz was to maximise the use of new technologies in order to minimise your expenses and provide an unsurpassed level of quality service.

A Sydney-based business, DeBoz has overcome the barriers this presents through implementing fast and efficient forms of communication technologies available in order to function quickly and professionally around Australia.

DeBoz is a family owned and operated business based on 40 combined years of extensive experience in design, manufacture and construction of residential and commercial buildings. Founded on this experience, DeBoz offers comprehensive services in the following areas:

Services Offered By Deboz

- Building Design for both Residential and Commercial markets
- Project Management
- Estimating
- 3D Presentation
- Interactive Multimedia Presentations (Architectural)
- Architectural Illustration
- Architectural Animation
- Chief Architect® Development and Implementation
- CAD/CAM Technology development
- Development of Alternate Systems - Panelisation
- Web Design

It is our guiding principle here at DeBoz to always try to understand your needs and requirements and, at the same time, provide you with the best possible service to your complete satisfaction. In doing this, we will always try to promote the 3D DeBoz Approach.

What Is The 3D Deboz Approach?

It is the simplest and most inexpensive way for you to see your future design in its complete 3D state without laying a single brick. Our high-end software allows you, the client, to walk-through your building before any construction is commenced, so that you can be completely satisfied with what is to be done before initiating work.

We are able to provide various forms of the virtual design, as both simple wire frame models, and completely rendered 3D virtual models. Being both effective and visually impressive, we here at DeBoz believe that it is the most effective way to ensure complete satisfaction for you, our client.

Why Use The 3D Deboz Approach?

As we already mentioned, it is the most effective and efficient way to ensure complete satisfaction before construction. With us, you can be sure to attain near perfection before dedicating yourself to further project development.

Look to us before you look at the rest. Offering complete project services, residential and commercial, DeBoz has everything you will ever need in one neat, professional and affordable package. We are only one phone call close.

DeBoz - Building Design Solutions, because "If you have a wish you wholeheartedly believe in, it will always come true"
